

HOSTED VOICE SERVICES

Do your employees need to make company calls from outside the office? With SMS Datacenter's Hosted Phone Services, remote workers can use the company phone system to call, text, conference, and more using a single cloud application.

STAY CONNECTED TO THE BUSINESS FROM ANYWHERE MOVE YOUR CORPORATE PHONE SYSTEM TO THE CLOUD

SMS Datacenter can set up your company's phone system in the cloud so your employees can make phone calls in and out of the office. An all-in-one cloud phone system can provide a seamless experience for collaborating with coworkers and staying in touch with customers.

Business Phones

Select competitively priced IP phone hardware from our vendor partners

Conference Calling

Bring multiple people together on the same phone call

SIP Trunking

Run your business phone system over the internet instead of a traditional phone line

Digital Receptionist

The system can answer calls automatically and present a custom company greeting

Call Routing

Route calls using features like direct dialing, forwarding, parking, and voicemail

Fully Managed

We provide installation, maintenance, and support for the phone system

WHY SMS DATACENTER?

CONNECT FROM ANYWHERE ON ANY DEVICE WITH **HOSTED VOICE SERVICES**

Today's flexible work environments require employees to stay connected. This is whether they are in the office, working remotely, or splitting time between both. Staff must continue to communicate with coworkers, clients, and partners in real time. Yet, many organizations rely on a mix of company landlines, video conferencing apps, and personal cell phones. Missed calls can lead to delayed responses, reduced productivity, and missed opportunities to win new business.

SMS Datacenter enables employees to access the company phone system from anywhere by hosting the infrastructure in the cloud. Instead of relying on traditional office-bound landlines, staff can use internet-based calling. This keeps them connected whether they are in the office, at home, or on the go. The phone system is accessible through an app on desktop computers and mobile devices.

EXPERT CONSULTATION

SMS can examine your current business phone infrastructure. Then, we'll determine the phone system needs of your business by interviewing employees and providing recommendations. Furthermore, we can manage and execute the phone system migration project from start to finish.

COST EFFECTIVE SOLUTION

Save on your monthly phone bill by taking advantage of the cost and flexibility benefits of the cloud. We can create an affordable package that includes advanced IP phones plus unlimited local and long distance calling. Your business will not need to make a capital investment in phone equipment and infrastructure. We take on those responsibilities for you.

INCREASED EFFICIENCY

When workers rely on separate office and personal phones, they miss critical calls from coworkers and customers. Employees can receive calls on the same phone number on multiple devices like a laptop or a smartphone. When using a single phone system, the business can experience improved employee productivity and enhanced customer experience.

RELIABLE & SECURE

Keep your systems running in a high-availability data center built for uptime and performance. Multiple connectivity options reduce risk and improve reliability. Additionally, layered physical and cybersecurity measures help protect your infrastructure. Meanwhile, we follow industry standards to support your data protection needs.

SCALES AS BUSINESS GROWS

Our hosted voice service can keep up with your evolving business needs, whether it's an SMB or an enterprise organization. With our cloud resources, we can add phone lines and extensions quickly and easily. We ensure optimal phone system performance by adapting the server workload to accommodate peak call volumes.

24/7 SUPPORT

SMS Datacenter is available around the clock to assist with any technical issues you may encounter. You can contact our service desk by phone and email. Our skilled technicians can resolve the most common phone system issues from our office. If needed, a technician can go directly to your office and provide hands-on tech support.

Our Hosted Voice Services can provide even more benefits than those listed here. A thorough IT assessment by a trusted SMS Datacenter specialist is the best way to find out that our Hosted Voice Services is the right solution for your business.

WHY SMS DATACENTER?

We strive not only to meet but to exceed the expectations of our customers. We believe that technology and creative solutions can provide the power to unlimited success. Our top priority is helping our customers in achieving solutions that lead to business results.
